

Syllabo Alpha Version
Emily Mattlin, Sarah Pardo, Safiya Sirota, Mileva Van Tuyl

Project Overview

A database of Wellesley courses that allows users to upload and access syllabi and rate courses. The web interface also enables Wellesley students to discuss courses and communicate with one another.

Account and Directory

Username: syllabo@cs.wellesley.edu

Password: welovescott

Directory: ~students/syllabo/alpha

Instructions

1. Connect to our web app on a port that's number is between 1943 and 1950 for CAS use.
2. Got to our homepage. URL: '/'
3. Click on the "Profile" tab in the navigation bar and then click on "login."
4. Click on "Create a Course."
 - i. Follow the sample input below to add a course to the database
2. Click on "Explore Courses." You should see the course you inputted on this page.
 - a. For the search bar...
 - i. Search by title and search "Introduction"
 - ii. Or search by department and search "Computer Science"
 - iii. Or search by cnum and search "27126"
 - iv. This should display the Introduction to Front End Web Development course.
 - b. For course pages....
 - i. Once you search for a course and are redirected to a course page, you can provide feedback for the course.
 - ii. Follow the instructions on the feedback form to rate different areas of the course on a scale from 1-5. Leave a comment if you wish. Then press submit. The course should reload with recalculated ratings and a list of comments.
 - iii. *The update course link is not yet active.*
 - c. Try to break our site. We have and will test it for bugs, but we appreciate your feedback and testing!

Sample input for the Insert Course Form:

Title: Introduction to Front End Web Development

Department: Computer Science

Course Number: CS 204

CRN: 27126

Professor: Scott Anderson

Semester: Spring

Year: 2020

Website: <http://cs.wellesley.edu/~cs204/schedule/schedule.html>

Syllabus: You could download the course syllabus page as a single file and then resave it as a PDF, just to see the functionality of file upload. Not the most realistic use of the app for CS 204, but many other courses do not have a course website (or only a google course site that is inaccessible to those not enrolled) and students could instead upload a PDF file of the Syllabus.

Here is all of our active code:
